

November 1, 2021

To My Dear Patient Families,

Effective December 31, 2021, I will be retiring from full time practice. It has been my pleasure to provide your pediatric and adolescent care and see many patients grow to productive healthy adults, with children of their own. It is not easy for me to announce this decision, but the time has come due to a recently diagnosed medical problem. I will still be around the office to occasionally help out and continue in an administrative role as long as I am able.

I have two excellent doctors associated with me. Dr. Stewart Wilkey is a board certified family practitioner who will accept all of my patients, if requested, and he is here 5 days/week. Dr. Catherine Lawson is a board certified internist who will accept my patients who are older than 18 years, if requested, and she is here 3 days/week. Traci Morgan, our physician assistant, is also available to help both doctors. If you wish to change to one of these doctors, which I highly recommend, all you have to do is to notify your insurance company of the doctor you choose if you are a member of an HMO or EPO. All others can indicate which doctor when calling for an appointment.

If you wish to transfer out of the practice, please refer to our website for records request information.

Thank you for your support through the past 45 years of private practice and your understanding with this difficult but necessary decision.

Gratefully yours,

Victor M. Dalforno, M.D.
